30” & 36” FLUSH-MOUNT GAS COOKTOPS

Model GLS3064R S

Model GLS3665R S

JOB AID
Part No. 8178526
FORWARD
This Whirlpool Job Aid, “30˝ & 36˝ Flush-Mount Gas Cooktops” (Part No. 8178526), provides the technician with information on the installation and service of the 30˝ & 36˝ Flush-Mount Gas Cooktops. For specific information on the model being serviced, refer to the “Use and Care Guide” provided with the 30˝ & 36˝ Flush-Mount Gas Cooktops.

The Wiring Diagrams used in this Job Aid are typical and should be used for training purposes only. Always use the Wiring Diagram supplied with the product when servicing the unit.

GOALS AND OBJECTIVES
The goal of this Job Aid is to provide information that will enable the service technician to properly diagnose malfunctions and repair the 30˝ & 36˝ Flush-Mount Gas Cooktops.

The objectives of this Job Aid are to:
• Understand and follow proper safety precautions.
• Successfully troubleshoot and diagnose malfunctions.
• Successfully perform necessary repairs.
• Successfully return the cooktop to its proper operational status.

WHIRLPOOL CORPORATION assumes no responsibility for any repairs made on our products by anyone other than Authorized Service Technicians.

— NOTES —
Your safety and the safety of others is very important.

We have provided many important safety messages in this Job Aid and on the appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word “DANGER” or “WARNING.” These words mean:

⚠️ **DANGER** You can be killed or seriously injured if you don’t immediately follow instructions.

⚠️ **WARNING** You can be killed or seriously injured if you don’t follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

WHIRLPOOL GAS COOKTOP WARRANTY

FULL ONE-YEAR WARRANTY

For one year from the date of purchase, when this appliance is operated and maintained according to instructions attached to or furnished with the product, Whirlpool Corporation will pay for FSP® replacement parts and repair labor to correct defects in materials or workmanship. Service must be provided by a Whirlpool designated service company.

FIVE-YEAR LIMITED WARRANTY

On cooktop burners, in the second through fifth years from the date of purchase, when this appliance is operated and maintained according to instructions attached to or furnished with the product, Whirlpool Corporation will pay for FSP® replacement parts for any gas burner to correct defects in materials or workmanship. Service must be provided by a Whirlpool designated service company.

Whirlpool Corporation will not pay for:

1. Service calls to correct the installation of your appliance, to instruct you how to use your appliance, to replace house fuses or correct house wiring, or to replace owner-accessible light bulbs.
2. Repairs when your appliance is used in other than normal, single-family household use.
3. Pickup and delivery. Your appliance is designed to be repaired in the home.
4. Damage resulting from accident, alteration, misuse, abuse, fire, flood, improper installation, acts of God or use of products not approved by Whirlpool Corporation or Whirlpool Canada Inc.
5. Repairs to parts or systems resulting from unauthorized modifications made to the appliance.
6. Replacement parts or repair labor costs for units operated outside the United States or Canada.
7. In Canada, travel or transportation expenses for customers who reside in remote areas.
8. Any labor costs during limited warranty.

WHIRLPOOL CORPORATION AND WHIRLPOOL CANADA SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion or limitation may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state or province to province.

Outside the 50 United States and Canada, this warranty does not apply. Contact your authorized Whirlpool dealer to determine if another warranty applies.

If you need service, first see the “Troubleshooting” section of the Use and Care Guide. After checking “Troubleshooting,” additional help can be found by checking the “Assistance or Service” section or by calling the Whirlpool Customer Interaction Center, 1-800-253-1301 (toll-free), from anywhere in the U.S.A. For parts and service in Canada, please call 1-800-807-6777. For product related questions in Canada, please call 1-800-461-5681.
INSTALLATION INFORMATION

L.P. GAS CONVERSION

**WARNING**

Electrical Shock Hazard
Disconnect power before servicing.
Replace all parts and panels before operating.
Failure to do so can result in death or electrical shock.

**NOTE:** Gas conversion from natural to L.P. gas must be done by a qualified installer.

To convert the cooktop for use with L.P. gas, perform the following steps.

1. Unplug cooktop or disconnect power.
2. Turn off gas supply to cooktop.
3. Use a screwdriver and remove the access cap on the gas distribution valve.
4. Turn the access cap over so that the letters L.P. are facing up, and then reinstall the cap on the valve.

5. To convert the cooktop burners for use with L.P. gas:
   a) Remove the grates and burner caps.
   b) Remove the two screws from the burners and remove the burners from the cooktop.
c) Open the L.P. Conversion pack and remove the contents.

**NOTE:** Each burner, and its associated gas valve, has a plastic bag containing an L.P. gas orifice and a bypass jet pin. The bags are marked with the burner/valve B.T.U. rating. Match the B.T.U. rating on the bag with the burner and valve locations (shown in the drawings at the bottom right column) for the cooktop you are converting. **Do not open the bags until you are ready to use them.**

---

**Orifice Bags (36” Model)**

**Bypass Jet Pin**

**L.P. Orifice**

**Burner Orifice**

**IMPORTANT:** Once removed, place the natural gas orifice **on top** of the appropriate orifice bag. After the L.P. orifice from the bag is installed, place the natural gas orifice in the bag for reuse if the cooktop is ever converted back to natural gas. Also do this for the bypass jet pins in step 6. Be careful not to interchange the natural and L.P. gas orifices and pins.

---

d) Use a 7 mm socket wrench and remove the orifices from the burner bases. **NOTE:** Place a small piece of masking tape along the inside edge of the socket to help hold each orifice in the driver.

---

e) Install the L.P. orifices in their appropriate burner bases (be careful not to crossthread or overtighten the orifices).

---

**30” Model Cooktop**

</tr>
</tbody>
</table>
```

---

f) Reinstall the burners on the cooktop.

g) Replace the burner caps on the burners.
6. **To convert the gas valves for use with L.P. gas:**
   a) Remove the control knobs from the gas valves.
   b) Reach inside the control panel openings with your fingers, and slide the rubber guards off the gas valve stems.
   c) Using a small screwdriver, unscrew and remove the bypass jet pins from the gas valves.
   d) Install the L.P. bypass jet pins in the gas valves until they are just snug. Do not overtighten the pins.
   e) Reinstall the control knobs on the gas valves.
   f) Remove the backing from the L.P. conversion sticker, and press the sticker onto the bottom of the cooktop chassis near the model/serial number label.

7. **To check the burner operation:**
   a) Turn on the power and gas supply to the cooktop.
   b) Light a burner, and quickly turn the gas valve from low to high, and then back to low. Both the high and low flames should be on steady and not go out. If the flame should go out at the high or low setting, it should automatically reignite.
   c) Repeat the previous step for the remaining burners.
   d) Reinstall the cooktop grates.
COMPONENT ACCESS

This section instructs you on how to service each component inside the 30” & 36” flush-mount gas cooktops. The components and their locations are shown below.

COMPONENT LOCATIONS

30” Model Cooktop

36” Model Cooktop
REMOVING THE BURNERS AND COOKTOP

WARNING

Electrical Shock Hazard
Disconnect power before servicing.
Replace all parts and panels before operating.
Failure to do so can result in death or electrical shock.

1. Unplug cooktop or disconnect power.
2. Turn off gas supply to cooktop.
3. Lift the burner grates off the cooktop.
4. Lift the burner caps off the burners.
5. Pull the control knobs off the gas valve stems.

6. Remove the two screws from each of the burners and remove the burners from the cooktop.

7. Remove the eight screws from the cooktop.
8. Remove the screws from the side of the control panel, and lift the control panel off the cooktop chassis.

(30˝ Model Cooktop Shown)
9. Lift the cooktop off the cooktop chassis, disconnect the wires from the ignitor terminals, and remove the cooktop.

**REASSEMBLY NOTE:** Since each of the burner ignitors for the 30” and 36” cooktops has its own spark module, make sure that you connect each of the module output wires to its corresponding ignitor.
REMOVING A BURNER BASE

1. Unplug cooktop or disconnect power.
2. Turn off gas supply to cooktop.
3. Remove the cooktop from the unit (see page 3-2 for the procedure).
4. Remove the 9/16” gas line nut from the burner base.
5. Remove the two screws from the burner base and remove the base from the cooktop chassis.
6. Remove the orifice from the burner base using a 7 mm socket, and install the orifice in the new burner base. Do not overtighten the orifice when you install it.

IMPORTANT: Refer to the “Reassembly Note” on page 3-3.

Electrical Shock Hazard
Disconnect power before servicing. Replace all parts and panels before operating. Failure to do so can result in death or electrical shock.

WARNING

(30” Model Cooktop)  (36” Model Cooktop)

Burner Bases

Burner Base
Screws

9/16” Gas Line Nut

Burner Orifice
REMOVING AN IGNITION SWITCH AND GAS VALVE

WARNING

Electrical Shock Hazard
Disconnect power before servicing.
Replace all parts and panels before operating.
Failure to do so can result in death or electrical shock.

1. Unplug cooktop or disconnect power.
2. Turn off gas supply to cooktop.
3. Remove the grates and pull the control knobs off the gas valve stems.
4. Remove the screws from the control panel, then lift and remove the control panel from the unit.

5. Lift the rubber guard off the gas valve you are servicing.

6. To remove an ignition switch:
   a) Disconnect the two wire connectors from the switch terminals.
   b) Unclip the e-ring from the gas valve shaft.
   c) Pull the switch straight up and off the gas valve.

7. To remove a gas valve:
   a) Remove the ignition switch (see step 6).
   b) Remove the 9/16” gas line nut from the valve.
   c) Remove the 5/16” hex-head screw from the valve clamp and remove the clamp.
   d) Remove the gas valve from the manifold.
REMOVING AN IGNITOR AND A SPARK MODULE

**WARNING**

Electrical Shock Hazard
Disconnect power before servicing.
Replace all parts and panels before operating.
Failure to do so can result in death or electrical shock.

1. Unplug cooktop or disconnect power.
2. Turn off gas supply to cooktop.
3. **To remove an ignitor:**
   a) Remove the cooktop from the unit (see page 3-2 for the procedure).
   b) Disconnect the wire from the ignitor terminal (if not already done).
   c) Unclip the e-ring and remove the ignitor from the cooktop.

4. **To remove a spark module:**
   a) Remove the grates and pull the control knobs off the gas valve stems.
   b) Remove the screws from the control panel, then lift and remove the control panel from the unit.
c) Disconnect the orange, white, and blue wires from the spark module terminals.
d) Remove the mounting screw.
e) Unhook the module from the cooktop chassis tab, and remove the module from the cooktop.

**IMPORTANT:** Refer to the “Reassembly Note” on page 3-3.
REMMOVING THE POWER SUPPLY CORD

WARNING

Electrical Shock Hazard
Disconnect power before servicing.
Replace all parts and panels before operating.
Failure to do so can result in death or electrical shock.

1. Unplug cooktop or disconnect power.
2. Turn off gas supply to cooktop.
3. Remove the grates and pull the control knobs off the gas valve stems.
4. Remove the screws from the control panel, then lift and remove the control panel from the unit.
5. If installed, cut the wire tie from around the gas manifold and the power supply cord wires.
6. Remove the twist-on connectors from the black and white power supply cord wires and separate the wires.
7. Remove the chassis screw from the power supply cord green ground wire.
8. Remove the power supply cord strain relief from the chassis hole and remove the cord from the unit.
COMPONENT TESTING

Before testing any of the components, perform the following checks:

- The most common cause for control failure is corrosion on connectors. Therefore, disconnecting and reconnecting wires will be necessary throughout test procedures.
- All tests/checks should be made with a VOM or DVM having a sensitivity of 20,000 ohms-per-volt DC, or greater.
- Check all connections before replacing components, looking for broken or loose wires, failed terminals, or wires not pressed into connectors far enough.
- Resistance checks must be made with power cord unplugged from outlet, and with wiring harness or connectors disconnected.

IGNITION SWITCH

Refer to page 3-5 for the procedure for accessing the ignition switches.

1. Unplug cooktop or disconnect power.
2. Disconnect the two wires from the ignition switch terminals.
3. Set the ohmmeter to the R x 1 scale.
4. Touch the ohmmeter test leads to the ignition switch pins.
5. Turn the gas valve shaft to the Off position. The meter should indicate an open circuit (infinite).
6. Rotate the gas valve shaft. The meter should indicate a closed circuit (0 Ω) at approximately 20° (LITE position) of rotation, and open again at approximately 30° of rotation.

WARNING

Electrical Shock Hazard

Disconnect power before servicing.
Replace all parts and panels before operating.
Failure to do so can result in death or electrical shock.

Ignition Switch Terminals
